Atkins	Atkins is a global design firm with interdisciplinary expertise in transportation planning, economic development, and infrastructure design and implementation. Our methodologies integrate all levels of transportation programming, from national masterplans to complex roadway projects, to foster strategic investment and cohesive growth. Utilizing the latest modeling technologies, we help decision makers—including USAID, DFID, and World Bank clients—map their existing infrastructure and evaluate future possibilities. Atkins advisory services in carbon tracking, environmental benchmarking, and disaster risk reduction further these offerings and present officials with the data necessary to craft sustainable solutions. As a \$4 billion company with offices worldwide, Atkins has both local presence and international capacity. This reach has helped us develop multi-sector partnerships that extend across in Africa, Asia, and the Middle East. By quantifying realities and modeling options, Atkins' has the ability to track past successes and help our clients meet the ever-changing demands of an evolving transportation sector. Cardno	Founded in 1945, Cardno is a global integrated professional services provider delivering a diverse range of services, including planning, engineering, and fiscal and project management. We are currently implementing transportation and other projects in over 100 countries and have helped MCC to manage over \$2.3 billion in infrastructure investments.	Mr.	Dustin	Bales	Development Specialist	dustin.bales@cardno.com	703-373-7661
CDM Smith	CDM Smith has worked in more than 100 countries to provide consulting, operations, engineering, construction and technical assistance for infrastructure projects performed on behalf of major development funding entities, including works funded by the MCC. For more than a decade, CDM Smith has worked to support implementation of MCC-funded compacts. Our experience includes implementation of task orders under the MCC's Project Management, Project Development, Environmental and General Engineering Consulting IQC (2006-2011), which included work in Ghana for due diligence of proposed investments supporting agriculture productivity, including electrification, water and sanitation (Compact value totaling US\$547M); Tanzania, for due diligence of proposed investments for improving urban and rural water and sanitation infrastructure (Compact value totaling US\$698M); and Mozambique, for due diligence of proposed investments to improve roads and water infrastructure (Compact value totaling US\$507M). CDM Smith has also served MCAs as Program Management Consultant (PMC) for the \$430M MCA-Lesotho Metolong Dam Activities Project (2008-2013, and extended post-Compact), and the \$332.5M MCA-Indonesia Green Prosperity Program (2010-2018). For projects in the transportation sector, CDM Smith brings architect-engineering skills in planning, design, construction and implementation, as well engineer-ing economics, institutional, policy and training expertise, to provide the basis for robust and sustainable infrastructure that underpins economic growth and poverty reduction. This includes studies, planning, design and construction supervision, training/capacity building and others services for rural/urban roads projects, rail, intelligent transportation systems, ports and shipping, and projects spanning other transportation sector disciplines. Sheladia Associates	Sheladia Associates, Inc. is a Rockville, Maryland-based engineering consulting firm with more 30 years of experience working with US federal government agencies and multilateral development banks on transportation infrastructure projects focused on Asia and Africa. As one of four ‘prime’ holders of MCC’s Transport and Vertical Structures BPA, Sheladia has a firm understanding and insight into MCC’s priorities and approach for the planning, oversight and evaluation of its road projects. Through our work on over 150 transport projects in the past decade, Sheladia has significant expertise in transportation economics (specifically using the HDM4 model), pavement evaluation, road maintenance and asset management as well as engineering services such as detailed design and construction supervision of all road types – from multi-lane limited-access expressways to rural gravel farm-to-market roads. Sheladia’s core capabilities also include a Monitoring and Evaluation practice which implements stand-alone M&E consultancies for USAID, World Bank and Asian Development Bank. In other words, we speak the language of both transportation engineers as well as evaluation experts and this uniquely positions us to effectively address MCC’s road evaluation needs.
